

Individual Initial Public Notice

Notification is hereby given to the public of the intent of the Federal Emergency Management Agency (FEMA) to provide assistance to the Low Country Regional Water System in Hampton County, SC, for construction and replacement of the electrical panel shed which provides power to the Yemassee Wastewater Treatment Facility, which was damaged in the 2016 major disaster declared as a result of widespread rain and extensive flooding.

Due to its location, this project is susceptible to future damages from flooding. Under the President's Executive Order 11988, Floodplain Management, FEMA is required to review the restoration of these facilities for opportunities to relocate it out of the floodplain or to minimize future damage from flooding. Public comment is invited on possible alternatives to these actions, methods to protect this facility and on whether this facility should be restored at all.

Interested persons may obtain information about this action and its specific location by calling **(803-943-1006) or emailing (brian.burgess@lowcountrywater.com)** between 8 a.m. and 5 p.m., Monday through Friday. Comments about this project and the application of the Floodplain Management Executive Order to it should be submitted in writing by March 15, 2019 to:

**Lowcountry Regional Water System
Brian Burgess, General Manager
513 Elm St West
Hampton, SC 29924**

This public notice will also serve as the final public notice provided there are no questions or concerns regarding this project.
